Atn. Allotees of industrial plots under Relocation Scheme of Govt. of NCT of Delhi who have not constructed the factory building within one year of taking physical possession.

During the survey conducted by DSIDC in the year 2017, 1706 number of industrial plots at Nandha, Barana & Bawana-II (Bhorgarh) Industrial Complexes were found vacant/unconstructed, which is in violation of the terms of allotment/lease deed on the part of the concerned allottees. The time period allowed for construction in these cases has lapsed which was for one year from the date of physical possession.

Further, the extension of time for construction was granted upto 31.12.2016 for allottees who had paid composition charges. Consequently, show cause notices dated 02.11.2017 were issued to such allottees who have failed to carry out construction in the allotted period, as to why the action of cancellation of allotment of plot should not be initiated.

In view of the above, all the allottees corresponding to 1706 industrial plots, whose list is already displayed on DSIDC website i.e. www.dsidc.org are once again informed to furnish any proof of construction of factory building on the allotted plot as per policy, if any, latest by 15.01.2018, failing which action for cancellation of allotment of plot/lease deed will be initiated without any further correspondence.
